

QUADRADYN

FOR WET & DRY STRANDS - PATENTED

BEST IN CLASS FOR:

WOOD BASED PANELS:
OSB/LSB/FOSB

WOOD RECYCLING AND
WASTE TREATMENT:
CUSTOMIZED SOLUTIONS
FOR RECYCLING

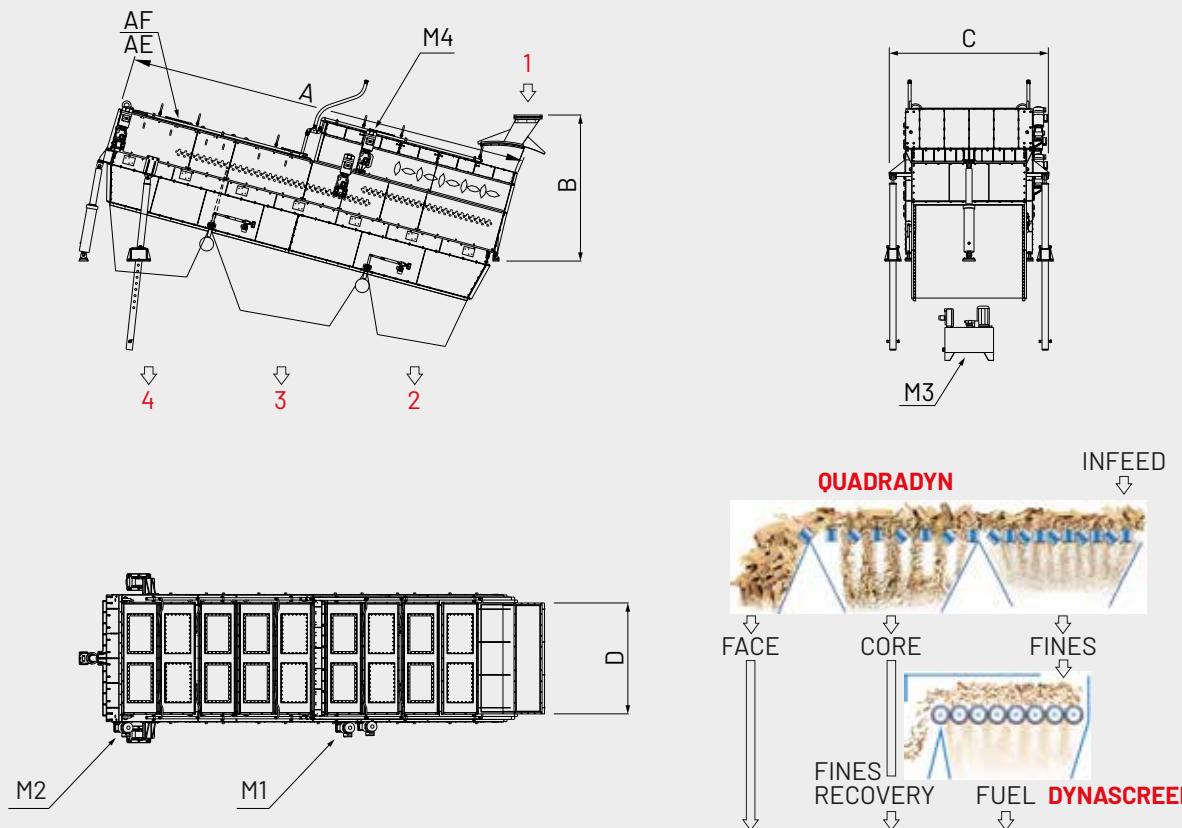

The machine is designed to select incoming bulk material by its size (grading). The rollers, made with specially designed profiles, rotate synchronously and generate the vibrations necessary for the transport and separation of the material.

TECHNICAL FEATURES

- Fluidizing rolls for better crosswise spreading of flakes at the screen infeed
- Roll screen with specialized roll profiles for requested cuts • Separation till 4 fractions • Suitable for green and dry strand screening • AF - Fire extinguishing system • AE - Explosion vents • Two side bearings and transmissions
- Highly flexible machine with quick and easy adjustments to match changes in the raw material: adjustable diverting gates - adjustable shaft speed - adjustable working angle - adjustable gap setting - pre-settable disk spacing • No strand breakage or generation of fines in the screening process.

BENEFITS

- No strand breakage or generation of fines in the screening process • Very efficient screening out of fines resulting in: increase in dryer capacity (green screening) - more uniform moisture content to the dryer (green screening) - reduction in dryer emissions (green screening) - reduction in drying costs (green screening) - lower fire risk in dryer (green screening) - reduced blender cleaning requirements - lower resin usage and higher board properties • Very efficient classification of strand size • Dedicated dryers for core and surface material (green screening) • Smaller footprint than drum screen for easy replacement in existing plants • Low maintenance, no plugging.

1 = INFEED
2 - 4 = FRACTIONS

M1 - M2 = MAIN MOTOR
M3 = HYDRAULIC POWER UNIT
M4 = FLUIDIZER DRIVE

FOR DRY MATERIAL ONLY:
AF = FIRE-EXTINGUISHING SYSTEM
AE = EXPLOSION VENTS
